It has been prepared solely to list the Bonds on the sustainable bond list of Nasdaq Stockholm. RISK FACTORS RELATING TO THE BONDS

This section describes risks which are specific to the Bonds and which Nivika considers to be material when making an investment decision in relation to the Bonds. The most material risk factor in a category, based on Nivika's assessment of the probability of the risk's occurrence and the expected magnitude of its adverse impact, is presented first in that category. Subsequent risk factors in the same category are not ranked in order of materiality or probability of occurrence. Where a risk factor may be categorised in more than one category, such risk factor appears only once and in the most relevant category. Each risk factor is disclosed by rating the relevant risk as low, medium or high in terms of the probability of the risk's occurrence as well as the expected magnitude of its adverse impact.

RISKS RELATING TO THE NATURE OF THE BONDS

Risks relating to the Bonds being unsecured

The Bonds constitute unsecured debt obligations of the Issuer. If the Issuer is subject to any foreclosure, dissolution, winding-up, liquidation, recapitalisation, administrative or other bankruptcy or insolvency proceedings, all of the Issuer's secured obligations must first be satisfied, potentially leaving little or no remaining assets in the Issuer for the bondholders and other unsecured creditors. As a result, the bondholders may not recover any or full value for the Bonds. The bondholders will only have an unsecured claim against the assets (if any) in the Issuer for the amounts under or in respect of the Bonds, which means that the bondholders normally would receive payment pro rata with other unsecured non-priority creditors after any priority creditors have been paid in full. Each investor should be aware that by investing in the Bonds, they risk losing the entire, or part of, its investment in the event of the Issuer's liquidation, bankruptcy or Group re-organisation. Further, the Issuer currently has outstanding secured debt, as further described below. Consequently, an enforcement of security furnished under the secured obligations can have a material negative effect on the bondholders' recovery under the Bonds.

The Issuer considers the probability that the risks relating to the Bonds being unsecured are realised to be medium and if the risks are realised, the Issuer considers the potential negative impact to be medium.

Dependency on subsidiaries, structural subordination and insolvency of subsidiaries

A significant part of the Group's assets and revenues are owned by and generated in the subsidiaries of the Issuer. The Issuer is thus dependent upon receipt of sufficient income and cash flow related to the operations of the subsidiaries. Consequently, the Issuer is dependent on the subsidiaries' availability of cash and their legal ability to pay management fees and make dividends which may from time to time be restricted by corporate restrictions and law. Should the Issuer not receive sufficient income from its subsidiaries, there is a risk that the bondholders' ability to receive interest payments and the Group's financial condition may be adversely affected. Furthermore, in the event of insolvency, liquidation or a similar event relating to one of the subsidiaries, all creditors of such subsidiary would be entitled to payment in full out of the assets of such subsidiary before any entity within the Issuer as a shareholder, would be entitled to any payments. Thus, the Bonds are structurally subordinated to

the liabilities of the subsidiaries and there is a risk that the bondholders may not recover any or full value for the Bonds.

The Group or its assets may not be protected from any actions by the creditors of any subsidiary of the Group, whether under bankruptcy law, by contract or otherwise.

The Issuer considers the probability that the risks relating to the Issuer's dependency on subsidiaries and structural subordination are realised to be medium and if the risks are realised, the Issuer considers the potential negative impact to be medium.

Risks relating to early redemption and put options

Under the Terms and Conditions, the Issuer has reserved the possibility to, under certain circumstances, redeem all outstanding Bonds during the period from the date falling six months before the final maturity date. There is a risk that the market value of the Bonds is higher than the early redemption amount and that it may not be possible for bondholders to reinvest such proceeds at an effective interest rate as high as the interest rate on the Bonds and may only be able to do so at a significantly lower rate.

According to the Terms and Conditions, the Bonds are subject to prepayment at the option of each bondholder (put options) at certain events. There is, however, a risk that the Issuer will not have sufficient funds at the time of such prepayment to make the required prepayment of the Bonds which could adversely affect the Issuer, e.g. by causing insolvency or an event of default under the Terms and Conditions, and thus adversely affect all bondholders and not only those that choose to exercise the option.

The Issuer considers the probability that the risks relating to early redemption and put options are realised to be medium and if the risks are realised, the Issuer considers the potential negative impact to be medium.

Risks relating to the admission to trading of the Bonds on Nasdaq Stockholm

Liquidity risks and listing of the Bonds

Pursuant to the Terms and Conditions the Issuer has an obligation to ensure that the Bonds are listed on the sustainable bond list of Nasdaq Stockholm within 12 months after the issue date of the Bonds (and with an intention to complete such listing within 30 calendar days after the issue date of the Bonds) or, if the Bonds are not admitted to the sustainable bond list of Nasdaq Stockholm, another Regulated Market (as defined in Markets in Financial Instruments Directive 2014/65/EU (MiFID II), as amended). However, there is a risk that the Bonds might not be admitted to trading. If the Issuer fails to procure listing in time, and such listing failure is not waived by the bondholders in accordance with the Terms and Conditions for the Bonds, each bondholder has the right to request that all or some of its Bonds be repurchased. If the Issuer fails to procure listing within 60 days from the issue date, the noteholders will not be able to hold the Bonds on an investment savings account (Sw. *ISK- or IR-konto*) which may have a potential negative tax impact for investors. Further, even if the Bonds are admitted to trading on a Regulated Market, active trading in the Bonds does not always occur and hence there is a risk that a liquid market for trading in the Bonds will not form or will not be maintained, even if the

Bonds are listed. As a result, the bondholders may be unable sell their Bonds when they so desire or at a price level which allows for a profit comparable to similar investments with an active and functioning secondary market or for a sale at par. Lack of liquidity in the market may have a negative impact on the market value of the Bonds. Furthermore, the nominal value of the Bonds may not be indicative of the market price of the Bonds if the Bonds are admitted for trading on the sustainable bond list of Nasdaq Stockholm, as the Bonds may trade below their nominal value (for instance, to allow for the market's perception of a need for an increased risk premium). It should also be noted that during any given period of time it may be difficult or impossible to sell the Bonds (at all or at reasonable terms) due to, for example, severe price fluctuations, close-down of the relevant market or trade restrictions imposed on the market.

The Issuer considers the probability that the risks relating to liquidity and listing of the Bonds are realised to be medium and if the risks are realised, the Issuer considers the potential negative impact to be medium.

Risks relating to debt instruments such as the Bonds

The bondholders are exposed to credit risks

Investors in the Bonds assume a credit risk relating to the Group. The payments to bondholders under the Terms and Conditions are therefore dependent on the Group's ability to meet its payment obligations, which in turn is largely dependent upon the performance of the Group's operations and its financial position. The Group's financial position is affected by several factors, some of which have been mentioned above. An increased credit risk may cause the market to charge the Bonds a higher risk premium, which would have an adverse effect on the value of the Bonds. Another aspect of the credit risk is that a decline in the financial position of the Group may reduce the prospects of the Group to receive debt financing at the time of the maturity of the Bonds.

The Issuer considers the probability that the bondholders are exposed to credit risks are realised to be medium and if the risks are realised, the Issuer considers the potential negative impact to be medium.

Risks relating to the interest rate structure of the Bonds

The Bonds' value depends on several factors, one of the most significant over time being the level of market interest since the Bonds will carry a floating rate interest. Investments in the Bonds involve a risk that the market value of the Bonds may be adversely affected by changes in market interest rates.

The process for determining STIBOR and other interest-rate benchmarks is subject to a number of legislative acts and other regulations. The most extensive initiative in this respect is the Benchmark Regulation (Regulation (EU) 2016/1011 of the European parliament and of the council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014). The Benchmark Regulation addresses the provision of benchmarks, the contribution of input data to benchmarks and the use of benchmarks within the European Union. Any significant change to the setting or existence of STIBOR might have a material adverse effect on the value or liquidity of, and the amount payable under, the Bonds. The Terms and Conditions for the

Bonds provide that the interest rate benchmark STIBOR, which applies for the Bonds, can be replaced as set out therein, if STIBOR ceases to be calculated or administered. However, there can be no assurance that such replacement will be made in an effective manner and consequently, if STIBOR ceases to be calculated or administered, an investor in the Bonds could be adversely affected.

The Issuer considers the probability that the risks relating to the interest rate structure of the Bonds are realised to be medium and if the risks are realised, the Issuer considers the potential negative impact to be medium.

Security over assets granted to third parties

The Group may, subject to certain limitations set out in the Terms and Conditions, incur additional, financial indebtedness and provide additional security for such indebtedness. The Group has granted security under the existing financing including security over the properties covering the full facility amounts and security over the shares in certain Group companies. Further, the Issuer and certain Group Companies have guaranteed other Group Companies obligations under existing financing.

As security has been granted in favour of a third party debt provider, and may be granted to additional debt providers, the bondholders will, in the event of bankruptcy, re-organisation or winding-up of the Issuer, be subordinated in right of payment out of the assets being subject to security provided to such third party debt providers. In addition, if any such third party debt provider holding security provided by the Group were to enforce such security due to a default by any company within the Group under the relevant finance documents, such enforcement could have a material adverse effect on the Group's assets, operations and, ultimately, the position of the bondholders.

The Issuer considers the probability that the risks relating to security granted to third parties are realised to be medium and if the risks are realised, the Issuer considers the potential negative impact to be medium.

Risks relating to green bonds

The Bonds are defined as "green" according to the Issuer's applicable green financing framework as at the first issue date (the "**Green Financing Framework**"). The Green Financing Framework, as well as market practice for green notes, may be amended and develop after the first issue date, thus affecting any of the requirements applicable to the Issuer in respect of any subsequent Bonds. Amendments to the Green Financing Framework after the first issue date will not affect the conditions applicable to the Bonds issued as at the first issue date. The Issuer's failure to comply with the Green Financing Framework does not constitute an event of default under the Terms and Conditions for the Bonds and would not permit noteholders to exercise any early redemption rights or receive any other type of compensation for non-compliance with the Green Financing Framework. There is however a risk that a failure to comply with the Green Financing Framework could have a material adverse effect on the market value of the Bonds due to investors perceiving the Bonds as a less favourable investment.

The Issuer considers the probability that the risks relating to green bonds are realised to be low and if the risks are realised, the Issuer considers the potential negative impact to be low.

Any determination to be made by an Independent Adviser, the Issuer or the Bondholders in accordance with the provisions of this Clause 9 shall at all times be made by such Independent Adviser, the Issuer or the Bondholders (as applicable) acting in good faith, in a commercially reasonable manner and by reference to relevant market data.

If it is or would be unlawful at any time under any applicable regulation or would contravene any applicable licensing requirements to determine the Base Rate in accordance with any of the provisions set forth in this Clause 9, the first subsequent permissible fallback shall apply.

9.2 Definitions

In this Clause 9:

"Adjustment Spread" means a spread (which may be positive, negative or zero) or a formula or methodology for calculating a spread, or a combination thereof determined in accordance with Clause 9.3(c), to be applied to a Successor Base Rate or an Alternative Base Rate, the objective of which, in each case, shall be to reduce or eliminate, to the fullest extent reasonably practicable, any transfer of economic value from one party to another as a result of a replacement of the Base Rate.

"Alternative Base Rate" means the reference rate that has replaced the Base Rate in customary market usage in the relevant debt capital markets for the purposes of determining rates of interest in respect of Bonds denominated in Swedish kronor and of a comparable duration to the relevant Interest Period or, if there is no such rate, such other rate as the Independent Adviser determines in its discretion is most comparable to the Base Rate.

"Base Rate Amendments" has the meaning set forth in Clause 9.3(d).

"Base Rate Determination Date" has the meaning set forth in Clause 9.3(b).

"Base Rate Event" means:

- (a) that the Base Rate has (i) been permanently or indefinitely discontinued, (ii) ceased to exist or (iii) ceased to be published for at least five (5) consecutive Business Days as a result of the Base Rate ceasing to be calculated or administered;
- (b) that the Base Rate Administrator ceases to publish the applicable Base Rate permanently or indefinitely and, at that time, no successor administrator has been appointed to continue to publish the Base Rate;

- (c) that the supervisor of the Base Rate Administrator (i) has made a public statement stating that the Base Rate is no longer representative of the underlying market or (ii) is recommending the usage of a Successor Base Rate for the applicable Base Rate;
- (d) that the Base Rate Administrator or its supervisor announces that (i) the Base Rate methodology has changed materially or (ii) the Base Rate may no longer be used, either generally or in respect of the Bonds;
- (e) that it has become unlawful for the Agent, the Issuer or the Issuing Agent to calculate any payments due to be made to any Bondholder using the applicable Base Rate; or
- (f) that a Base Rate Event Announcement has been made and the announced Base Rate Event will occur within six (6) months.

For the avoidance of doubt, the Issuer will not be obliged to take any such actions until obliged to do so pursuant to Clause 9.3(b).
- (b) If the Issuer or Bondholders representing more than fifty (50) per cent. of the Adjusted Nominal Amount or, if a Bondholders' Meeting has been convened or a Written Procedure instigated, Bondholders representing more than fifty (50) per cent. of the Adjusted Nominal Amount for which Bondholders are voting at a Bondholders' Meeting or for which Bondholders reply in a Written Procedure, determines that a Base Rate Event has occurred, the Issuer shall use all commercially reasonable endeavours to, as soon as reasonably practicable and at the Issuer's expense, appoint an Independent Adviser to determine, no later than ten (10) Business Days prior to the
